

SQL Exam Notes

Sidney Silva Braz de Oliveira

December 2022

1 Basic commands:

VIEWS

To **create** a **VIEW**, we use:

```
CREATE VIEW nombre_de_la_view AS  
SELECT ...
```

Example of a **INNER JOIN** code:

```
SELECT c.customer_name, sc.qty, sc.customer_id  
FROM shopping_cart AS sc  
INNER JOIN customers AS c  
ON sc.customer_id = c.customer_id
```

Another example:

```
CREATE VIEW shopping_cart_enchaced  
SELECT p.product_name, c.customer_name, qty  
FROM shopping_cart AS sc  
INNER JOIN products AS p ON sc.product_id = p.product_id  
INNER JOIN customers AS c ON sc.customer_id = c.customer_id
```
